

The Kiara! Color Label Printer Family

Full-Range Label Printers for Every Application

The Kiara! delivers flexibility in labeling. With the Kiara! inkjet label printer family, you'll be able to print finished labels virtually as fast as you generate work orders. You'll leverage its all-digital, high-speed label printing capacity to manage labels for your diverse product line, to custom-print private label packaging, and to personalize your products. With the digital on demand Kiara! label printer, you will only spend money when you actually print labels – never for a minimum order of pre-printed labels that gather dust in your stockroom and decline in value. And with four separate ink cartridges, you will only replace inks one color at a time.

You'll always have product labels at your fingertips when you print your own labels with a Kiara!. There will be no more time delays or friction caused by working with an outside label printing company, and no concern over whether you have the right labels in inventory.

Fast Inkjet Label Printer Designed for High Production

Kiara! Inks: The Kiara! uses four separate ink cartridges, one for each CMYK color. Printing at 12 meters per minute in 1200 dpi requires very precise, small droplets, and the Kiara! ink set uses a special chemical formulation to print at this high speed and resolution. Kiara! inks have excellent flow and quick drying characteristics, and maintain their color on the shelf for months without fading. Each Kiara! ink comes in a 240mL large capacity cartridge.

Kiara! Labels: To produce labels that go beyond just beautiful appearance (although they have that too) QuickLabel developed Kiara! paper and synthetic label substrate materials to work specifically with Kiara! inks. Kiara! materials produce high performance labels that resist moisture, abrasion, smearing, many solvents, and UV light, and that can be used in high heat as well as refrigerator and freezer conditions. Finished Kiara! labels are available in hundreds of sizes and shapes.

The Kiara! Prints Labels from 2,5 – 10 cm in width and more than 38 cm in length.

This printer is perfect for bottle, box, crate, and product packaging labels, which display printed product photos, logos, color codes, barcodes, and other variable data.

The Kiara! 50 is a desktop color label printer for small labels ranging from 2,5 – 4,9 cm in width. This printer stands at 25 cm tall and weighs just 4,5 kg. But don't be deceived by its size – the

Kiara! 50 is capable of printing up to 68 labels per minute.

The Kiara! 200 prints labels with a width from 10 – 20 cm

and length of more than 38 cm. With four separate ink cartridges and low costs of operation, this printer is perfect for bigger products such as pallets, 5-liter containers, drums and GHS applications.
